DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group A in Paper No. 6 is acknowledged.
2. Claims 8, 10, and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **with** traverse in Paper No. 6. Examiner would like to reiterate that upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to an apparatus, classified in class 83, subclass 452.
 - II. Claims 12-15, drawn to a method, classified in class 83, subclass 13.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus, of group I, could perform a different process, such as one that incorporates a head rail holding plate and the blind holder secured to a lower guide channel on a base plate and an upper guide channel secured to the an upper portion of the holding plate.

Art Unit: 3724

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
